Week 7 : Assignment 7

The due date for submitting this assignment has passed.

Due on 2022-09-14, 23:59 IST.

Assignment submitted on 2022-09-14, 23:04 IST

For the first five questions, consider the following set of requirements for a college job placement process. If the CGPA is ≥ 8 (out of 10), then the students are eligible for companies that offer salaries \geq INR 20,00,000/= per annum. If the CGPA is between 6 and 8 then they are eligible for companies that offer salaries less than INR 20,00,000/= per annum. If there aren't any companies with salary offers \geq INR 20,00,000/= per annum in a particular period, then those with CGPA ≥ 8 will also appear in the companies in the lower salary categories. Those with less than 6 CGPA will not be assisted by the college placement office for their placements. Answer the following questions related to equivalence partitioning based testing of these requirements.

1) How many partitions will be there for the input CGPA if we consider only valid inputs?

1 point

- ☒ Three partitions.
☐ Five partitions.

Yes, the answer is correct.

Score: 1

Accepted Answers:

Three partitions.

2) Do the test inputs {CGPA = 8, CGPA = 9, CGPA = 9.5} belong to the same partition? 1 point

- ☒ Yes, they belong to the same partition.
☐ No, they belong to different partitions.

Yes, the answer is correct.

Score: 1

Accepted Answers:

Input Space Partitioning (unit? unit=59&lesson=62)

Input Space Partitioning: Coverage Criteria (unit? unit=59&lesson=63)

Input Space Partitioning Coverage Criteria: Example (unit? unit=59&lesson=64)

Practice: Week 7 : Assignment 7 (Non Graded) (assessment? name=117)

Quiz: Week 7 : Assignment 7 (assessment? name=142)

Week 7 Feedback Form: Software Testing (unit? unit=59&lesson=130)

Yes, they belong to the same partition.

3) What is the expected output for the test case containing CGPA = 8 as input? **1 point**

- ☒ Eligibility for offers above INR 20,00,000/= per annum and if no such offers exist, eligible for all offers.
- ☐ Only eligible for offers above INR 20,00,000/= per annum.

Yes, the answer is correct.

Score: 1

Accepted Answers:

Eligibility for offers above INR 20,00,000/= per annum and if no such offers exist, eligible for all offers.

4) State true or false: A student has a CGPA of 6 and will be eligible to appear for placements for companies with a salary offer of INR 20,00,000/=. **1 point**

- ☐ True.
- ☒ False.

Yes, the answer is correct.

Score: 1

Accepted Answers:

False.

5) Which of the following is a correct partitioning of inputs? **1 point**

- ☐ Salary range: 1. INR x to INR 20,00,000, 2. INR 20,00,001 to INR y where x is the minimum salary offered and y is the maximum salary offered.
- ☐ Salary range: 1. INR 0 to INR 20,00,000, 2. \geq INR 20,00,000.
- ☐ Both the options above can be valid partitions.
- ☒ None of the options above are valid partitions.

No, the answer is incorrect.

Score: 0

Accepted Answers:

Both the options above can be valid partitions.

6) Amongst the various coverage criteria for input space partitioning, which is the most expressive and which is the least expressive? **1 point**

- ☐ All combinations coverage is the least expressive and multiple base choice coverage is the most expressive.
- ☐ All combinations coverage is the most expressive and multiple base choice coverage is the least expressive.
- ☐ Each choice coverage is the most expressive and all combinations coverage is the least expressive.
- ☒ Each choice coverage is the least expressive and all combinations coverage is the most expressive.

Yes, the answer is correct.

Score: 1

Accepted Answers:

Each choice coverage is the least expressive and all combinations coverage is the most expressive.

7) State true or false: Multiple base choice coverage subsumes pair-wise coverage. **1 point**

☐ True.

☒ False.

Yes, the answer is correct.

Score: 1

Accepted Answers:

False.

8) Which criterion below will have a maximum number of test cases? **1 point**

☐ Each choice criterion.

☒ All combinations criterion.

☐ Base choice coverage criterion.

☐ Multiple base choice coverage criterion.

Yes, the answer is correct.

Score: 1

Accepted Answers:

All combinations criterion.

9) When does T -wise coverage criterion become the same as all combinations coverage criterion? **1 point**

☐

When the value for T is the maximum value in a partition.

☒

When the value for T is equal to the number of partitions.

Yes, the answer is correct.

Score: 1

Accepted Answers:

When the value for T is equal to the number of partitions.

10) State yes or no: While partitioning the inputs using equivalence partitioning, both valid and invalid inputs need to be considered. **1 point**

☒ Yes.

☐ No.

Yes, the answer is correct.

Score: 1

Accepted Answers:

Yes.
